

Subject specific grading criteria proposed by the Environmental Science/Engineering staff and established by the Board of Undergraduate Studies of Science, Technology and Media 2007-04-11.  
MIUN 2007/903

## Grading criteria: Environmental Science

Grade	Criteria
A	<p><b>Level:</b> The student demonstrates outstanding results considering the requirements set in the course learning objectives regarding subject knowledge, concept comprehension, system knowledge, knowledge and application of methods, and also interdisciplinary analytical ability, ability of judgment and problem-solving skills.</p> <p><b>Range:</b> The student has in-depth knowledge and skills in all of the course learning objectives.</p>
B	<p><b>Level:</b> The student demonstrates excellent results considering the requirements of the course learning objectives regarding subject knowledge, concept comprehension, system knowledge, knowledge and application of methods and also interdisciplinary analytic ability, ability of judgment and problem-solving skills.</p> <p><b>Range:</b> The student fulfills the course learning objectives and has in-depth knowledge and skills in most of the course learning objectives.</p>
C	<p><b>Level:</b> The student demonstrates good results considering the requirements of the course learning objectives regarding subject knowledge, concept comprehension, system knowledge, knowledge and application of methods, as well as interdisciplinary analytic ability, ability of judgment and problem-solving skills.</p> <p><b>Range:</b> The student fulfills the course learning objectives and has in-depth knowledge and skills in some of the course learning objectives.</p>
D	<p><b>Level:</b> The student demonstrates satisfactory results considering the requirements of the course learning objectives regarding subject knowledge, concept comprehension, system knowledge, knowledge and application of methods, as well as interdisciplinary analytical ability, ability if judgment and problem-solving skills.</p> <p><b>Range:</b> The student fulfills the course learning objectives and has in-depth knowledge and skills in one or a couple of learning objectives.</p>
E	<p><b>Level:</b> The student demonstrates sufficient results considering the requirements of the course learning objectives regarding subject knowledge, concept comprehension, system knowledge and application of methods, as well as interdisciplinary analytical skills, ability of judgment and problem-solving skills.</p> <p><b>Range:</b> The student fulfills the course learning objectives.</p>

<p><b>Fx</b></p>	<p>Failed but revision is possible.  Revision possible within the timeframe indicated by the examiner.  <b>Level:</b>  The student demonstrates insufficient results considering the requirements of the course learning objectives regarding subject knowledge, concept comprehension, system knowledge, knowledge and application of methods, as well as interdisciplinary analytical skills, ability of judgment and problem-solving skills.  <b>Range:</b>  The student does not fulfill all of the course learning objectives.</p>
<p><b>F</b></p>	<p>Failed.  <b>Level:</b>  The student demonstrates insufficient results considering the requirements of the course learning objectives regarding subject knowledge, concept comprehension, system knowledge, knowledge and application of methods, as well as interdisciplinary analytical skills, ability of judgment and problem-solving skills.  <b>Range:</b>  The student does not fulfill the course learning objectives.</p>
