

The Disciplina Index

The offer

We are looking for a company that can hold the Application Management, and be the carrier of knowledge who implement and educate and sells the software Disciplina Index (developed in Filemaker). The solution is based on the needs of the universities offering the Rector program, the extensive experience of today's Excel-based management and the clients that are developed in-house at some universities. The School Agency is involved in the development and is keen to utilize Disciplina Index more. Existing developer of the platform is available for further cooperation.

Main purpose

Discipline index:

- Reduces the time required for administration by facilitating and streamlining administration. For example, in the handling of data for invoicing of international exchange. In certain torque is given a time reduction from 16 to 2 hours, 14 hours or 87.5% time savings
- Increasing quality by reducing the number of errors
- Is developed based on the user's focus
- Is a specific system designed to streamline the administration of educational institutions
- Can be adapted and implemented several learning platforms
- Is designed to be easily adapted to the respective institution's graphic identity.
- Is a standardized platform
- Has many development opportunities
- System as a Service

Usage areas

Primarily for Swedish higher education institutions that want to reduce their manual handling of Excel files in the administration of commissioned courses.
